Mother Nature's Garden

A Puppet Show for Grades K-3

Presented by Clark County Environmental Services

Free to all Clark County schools!

**"You're gonna see ladybugs, butterflies,
and lots of birds and bees,
And they'll keep your garden growing naturally!"**
From 'Mother Nature's Garden' puppet show

Join Mother Nature and Sammy Salmon as they teach their friend Sally about gardening the natural way! Learn how healthy soil helps plants thrive, and how good bugs can be a better, safer alternative to pesticides. The lively characters and songs of this half-hour show will capture the hearts of your students and increase their understanding of nature – and of how their own activities will affect our environment.

This award-winning show can be professionally presented in your school's library, forum, gym or multi-purpose room for groups of 50 to 150 students per show. A learning activity packet is provided for each classroom. We've presented over 500 Clark County performances, in 75 schools, since 2000!

EALR Connections Are Available!

To schedule puppet shows for
your school, please call:
